Why study French abroad?

To compete in an ever-globalizing, competitive job market, no college education is complete without the skills and experiences that studying abroad can offer. International education and experiences bring academic variety and challenges, personal growth, and professional and networking opportunities to the table.

"Immerse yourself in a language is the key to mastering it. As an exchange student at l’Université Catholique de Lille, I took classes taught only in French, so I had no choice but to use my French all the time. This experience forced me to engage with parts of the language that I was uncomfortable with - which ultimately led to my fluency in the language. I would highly recommend this experience to all French majors!"
